## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election of claims of Group I, claims 1-39 in the reply filed on 05/10/2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

This application further contains claims directed to the following patentably distinct species of the claimed invention:

Species 1: First Embodiment of Fig. 1.

Species 2: Second Embodiment of Fig. 2.

Species 3: Third Embodiment of Fig. 3.

Species 4: Fourth Embodiment of Fig. 4.

Species 5: Fifth Embodiment of Fig. 5.

Also included in each of the embodiments listed above are sub-embodiments consisting of specific materials for each of the species.

a) First material film 30:

n-type poly silicon film, p-type poly silicon film, silicon oxide film, aluminum oxide film. One of the materials needs to be selected.

b) Second material film 32:

n-type poly silicon film, p-type poly silicon film, silicon oxide film, aluminum oxide film. One of the materials needs to be selected.

c) Resistant material (amorphous dielectric film 26, 38):

Art Unit: 2811

Silicon nitride film, aluminum oxide film. One of the materials needs to be selected

d) Conductive plug 24:

the conductive plug is the same material as the material of the source region (n-type poly silicon plug), the conductive plug is a gold plug, the conductive plug is a platinum plug. One of these materials also needs to be selected.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the

Art Unit: 2811

case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
